INTRODUCTION:

A clean India would be the best tribute India could pay to Mahatma Gandhi on his 150 birth anniversary in 2019,” said Shri Narendra Modi as he launched the Swachh Bharat Mission at Rajpath in New Delhi. On 2nd October 2014, Swachh Bharat Mission was launched throughout length and breadth of the country as a national movement.

While leading the mass movement for cleanliness, the Prime Minister exhorted people to fulfil Mahatma Gandhi’s dream of a clean and hygienic India. Shri Narendra Modi himself initiated the cleanliness drive at Mandir Marg Police Station. Picking up the broom to clean the dirt, making Swachh Bharat Abhiyan a mass movement across the nation, the Prime Minister said people should neither litter, nor let others litter. He gave the mantra of ‘Na gandagi karenge, Na karne denge.’ Shri Narendra Modi also invited nine people to join the cleanliness drive and requested each of them to draw nine more into the initiative.

By inviting people to participate in the drive, the Swachhta Abhiyan has turned into a National Movement. A sense of responsibility has been evoked among the people through the Clean India Movement. With citizens now becoming active participants in cleanliness activities across the nation, the dream of a ‘Clean India’ once seen by Mahatma Gandhi has begun to get a shape.

The Prime Minister has helped spread the message of Swachh Bharat by urging people through his words & action. He carried out a cleanliness drive in Varanasi as well. He wielded a spade near River Ganga at Assi Ghat in Varanasi under the Clean India Mission. He was joined by a large group of local people who cooperated in the Swachhta Abhiyan. Understanding the significance of sanitation, Prime Minister, Shri Narendra Modi has simultaneously addressed the health problems that Indians families have to deal with due to lack of proper toilets in their homes.

People from different sections of the society have come forward and joined this mass movement of cleanliness. From government officials to jawans, bollywood actors to the sportspersons, industrialists to spiritual leaders, all have lined up for the noble work. Millions of people across the country have been day after day joining the cleanliness initiatives of the government departments, NGOs and local community centres to make India clean. Organising frequent

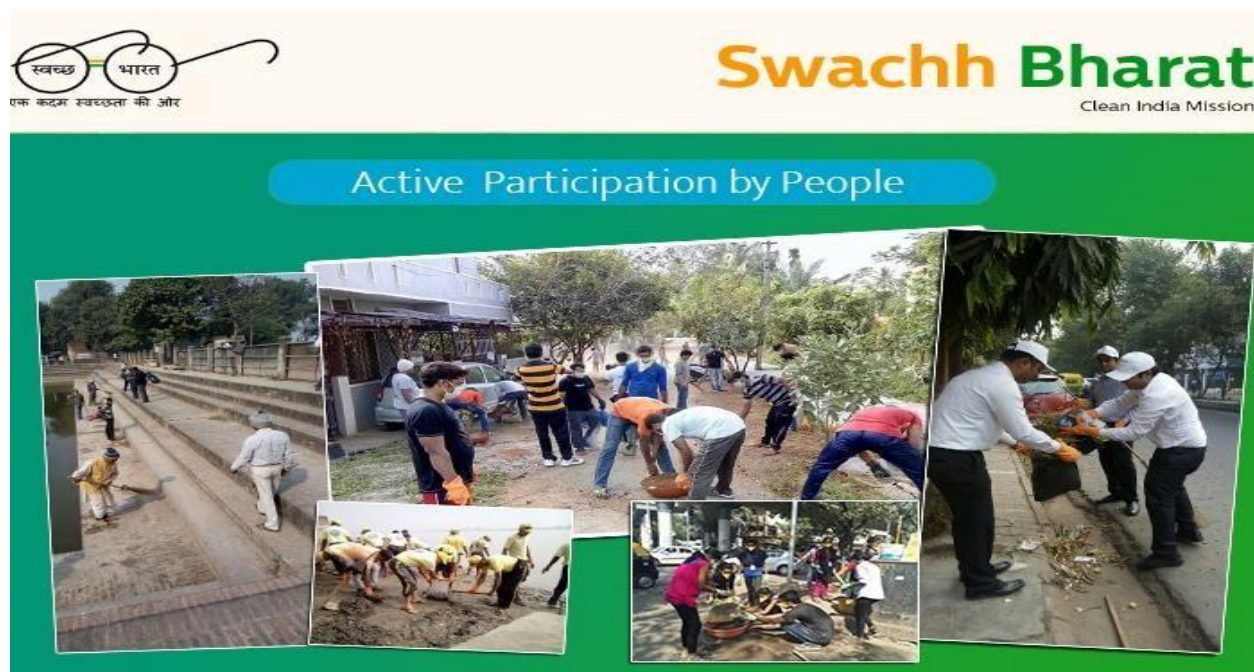

cleanliness campaigns to spreading awareness about hygiene through plays and music is also being widely carried out across the nation.

Bollywood celebrities to television actors came forward and actively joined the initiative. Noted personalities like Amitabh Bachchan, Aamir Khan, Kailash Kher, Priyanka Chopra and entire cast and crew of SAB TV show 'Taarak Mehta Ka Ooltah Chashmah' lend a hand to Swachh Bharat Abhiyan. Numerous sportspersons like Sachin Tendulkar, Sania Mirza, Saina Nehwal and Mary Kom's contribution to the clean India drive have been commendable.

Prime Minister Narendra Modi, in his monthly radio address 'Mann Ki Baat', has time and again lauded the efforts of individuals and various organizations across the country that have helped make the Swachh Bharat Abhiyan a huge success. The Prime Minister complemented a team of Government officials of Madhya Pradesh's Harda district for their role towards a cleaner India. PM also praised five students of New Horizon School in Bangalore who developed a mobile based application for buying and selling waste.

Organisations like ICICI Bank, Punjab National Bank, XLRI Jamshedpur and IIM-Bangalore initiated mass cleanliness drives and spread awareness among the general public.

Components of the Swachh Bharat Mission

Swachh Bharat Mission (Gramin): This initiative was started to ensure cleanliness and eliminate open defecation in India in five years. Its mission is to improve rural sanitation by adopting solid and liquid waste management operations and ensuring that villages are open defecation free (ODF).

It aims at expanding the scope of rural sanitation coverage and eradicating open defecation. The Swachh Bharat Mission's primary motive in the Gramin sector is to encourage sustainable sanitation practices in villages and promote the usage of technology for sustainable sanitation.

Swachh Bharat Mission (Urban): This scheme tries to fulfil a three-fold objective. The first objective is to limit the number of people who still go for open defecation. The second is to convert pit based washrooms into sanitary latrines. The third objective is to stop the construction of any new unsanitary and unclean bathrooms. The mission of the urban sector aims to construct community toilets in residential areas where it is challenging to make individual household toilets.

As part of the scheme, public restrooms will also be built-in tourist spots, markets, bus stations, and railway stations. Eradication of manual scavenging is also one of the objectives of the urban mission.

Objectives of Swachh Bharat Mission

- Hygiene and cleanliness should be promoted comprehensively.
- To reduce the number of people and households who defecate in the open.
- Raising the standard of living in rural communities.
- Encourage the use of environmentally appropriate sanitation.
- To raise public awareness about health and hygiene concerns
- To assist India in realising the aim of sustainable development.
- To encourage the use of cost-effective and efficient sanitation solutions.
- To concentrate on scientific waste management strategies for both solid and liquid waste.
- To have a positive impact on social inclusion and gender equality.

Swachh Bharat Mission Approach

The programme employs a multi-faceted strategy to fulfil the sanitation and hygiene aims. Take a look:

- Participation of the community- The initiative's primary focus is to increase people's involvement.
- Promoting behaviour change- It is a healthy technique to promote positive efforts to provide rewards and incentives to the highest-performing businesses.
- Flexibility in making decisions- Every citizen has the choice of upgrading their toilets based on their needs and financial circumstances.
- Use of technology- One of the unique elements of this programme is that it incorporates the factor of rising information technology power. This program's success is due to its extensive use of social media and cutting-edge technologies.
- Capacity building- The project includes the cleaning framework from the grass-root to the

district level—this system’s holistic approach aids the plan in effectively strengthening community capacity.

- Swachh Bharat Kosh- Instilling Swachh Bharat Kosh in every part of the resource base, from Swachh Bharat Kosh to the organisation’s Corporate Social Responsibility, is the main engine behind the program’s massive reach.

DUTIES & RESPONSIBILITIES REGRADING SWACHH BHARAT ABHIYAN

Role of Students in Swachh Bharat Mission

On the date of launching of the Swachh Bharat Abhiyan, the Prime Minister has clearly stated that every student and child will play the most important role in spreading and promoting the cleanliness in whole India that is why he had declared every student of India the brand ambassador of Swachh Bharat Abhiyan.

Swachh Bharat Abhiyan is such an initiative, in which the participation for every individual is equally and very important. Although the Swachh Bharat Abhiyan needs the co-operation of every Indian yet the co-operation of the students of India plays the most important role in making the campaign truly successful. We are describing here few points to elaborate the role of students in Swachh Bharat Abhiyan/Clean India Campaign:

Role of Students from Rural Areas in Swachh Bharat Abhiyan

- The students from rural areas strongly need the awareness about the healthy habits that is why the authorities and responsible teachers should regularly teach students about the healthy habits and their benefits.
- Usually Rural areas use dustbin almost nowhere which is the biggest reason for the cleanliness campaign to be operated in these areas. Students should have a habit of using dustbin in schools as well as at the houses and should also ask their parents to use it.
- The students can visit all nearby houses in their village and request people to not defecate in open by telling them the dark side of it. They can also motivate them to use household toilets.
- Most of the rural people are still unaware of the support of the government for the construction

of household toilets so students can make them aware of the scheme of the government and also about the procedure of applying for it.

- Many children in school can't go to school due to the insufficient funds and facilities so it becomes the responsibility of those who go to school, to teach those fellows about healthy habits and sanitation and can keep them away from diseases.
- The authorities should also plan some awards for the students to laud their valuable support towards the cleanliness.
- The students should be taught the process and benefits of land-filing so that they can motivate their parents and neighbours to adapt to it instead of spreading the pile of garbage.

Role of Students from Urban Areas in Swachh Bharat Abhiyan

- The educational authorities should step ahead to make a new rule under which there would be a mandatory class for every student in which they would be taught about the cleanliness, the benefits of cleanliness and the losses that meet due to lack of it. The authority should also ensure the presence of every student in that class.
- The students should be taught the healthy habits of sanitation and hygiene like brushing teeth twice a day, bathing regularly, cutting of nails regularly, washing hands before having meals, avoid eating unhealthy and stale food etc.
- The Students should also conduct several cleanliness drives in guidance of their teachers like cleaning of their class, school, mess, play-grounds and surrounding areas of their School.
- The Students should use dustbins for the disposal of their every single obsolete stuff and should also teach other students to do so.
- The students can also plan some plantation programmes in their free times in which they with their friends can plant several plants on nearby places of their School and also their house and society which are not in use.
- With the work of sanitation, students can also work of motivation by telling their parents, relatives and neighbours about these activities related to cleanliness that they have done in School and also about the benefit of cleanliness.
- The students can also fix a day of the week and declare that the cleanliness day on which they would spend their time on cleaning the areas surrounding them either in their locality or nearby

their school.

- Clicking the photo of the spot before the cleanliness drive and after the cleanliness drive and publishing it on social media would also put a major impact on other people to bring some changes around them with the help of cleanliness.
- By keeping cleanliness in and around the School, students can convey a deep message to the society and I am very sure that it will not fail in making other people realizing the value of cleanliness and indulging other in the campaign.
- Littering everywhere especially in public places is the main problem Indian cities are suffering from so students can also take stand to cleaning these areas and decorate them in such a way that no other would dare to litter there anymore.
